THESE 2 RACKS HAVE T-SLOT BARS RUNNING FRONT-TO-BACK OF VEHICLE, AND SO ARE MORE SUITABLE FOR MOUNTING CASES CROSSWISE ON ROOF. IF MOUNTING CASE INLINE ON CROSSBAR IT IS PREFERABLE TO HAVE MORE THAN ONE BAR SUPPORTING THE CASE FLOOR.									

NOTE: DESIGNED FOR PELICAN LONG CASES MOUNTED LENGTHWISE (FRONT-TO-REAR OF VEHICLE) ON RACKS WITH BARS RUNNING ACROSS ROOF WIDTH.

MAY ALSO FIT PLATFORM RACKS WITH T-SLOT BARS RUNNING FRONT-TO-REAR OF VEHICLE, IF FLOOR OF CASE IS FULLY SUPPORTED WITH MORE THAN ONE ROOF CROSSBAR.

* Kits ONLY include fasteners compatible with 10-series 80/20 cross-bars (1/4-20 Carriage bolts, nuts, washers). These are commonly used on several popular roof rack brands and DIY rack designs.

* Other racks marked with * above require separate purchase of compatible carriage/T-bolts, washers and nuts (up to M8 or 5/16" thread diameter).

Pelican Cargo Case Roof Mounts cannot be fitted directly to a vehicle's OEM cross bars.

Pelican Cargo Case Roof Mounts cannot be fitted to mesh-floor roof racks.

Roof racks come in many different sizes; please confirm that the dimensions of your desired Pelican Cargo Case fits your rack.
