

If you like the convenience of AA alkaline batteries, but need the performance of lithium batteries, the 2360 LED is the light for you. Using 2 standard AA alkaline batteries, the new 2360 LED emits a peak output of 375 lumens. The 2360 includes 3 modes – High / Strobe / Low and allows the user to select from 4 selectable programs. With the included 29 lumen low beam a run time of up to 13 hours will support close up use and any extended time needs. A strobe mode is also included for tactical or signaling purposes. The built-in battery level indicator ensures you will not be left in the dark.

Constructed with the most durable of materials: an aerospace grade aluminum body and an impact resistant LED lamp module, the 2360 LED keeps you on point without equipment failure.

High, Low and Strobe light output is available with a push of the tail button. It features a non-slip textured body for secure handling. The removable pocket clip offers alternative carry options.

- 375 lumens
- 3 modes High / Strobe / Low
- 4 Selectable Programs
- Battery Level Indication
- 2 AA Batteries (included)
