

DIRECT LIGHT WHERE YOU NEED IT

The new Pelican™ 2365 LED flex neck light lets you shine light where it's needed. Whether you are working in the engine bay of your car or under the fuselage of a jet, the 2365 ensures you can work hands free in bright LED light.

A magnetic base attaches metal surfaces and the 15" flexible neck directs 65 lumens of bright LED light. A push button tail switch activates the efficient 2365 for 7 hours of burntime on two standard AA batteries.

The new 2365 flex neck light allows you to be flexible at work.

- Built Pelican tough
- Super bright LED beam
- Compact and Lightweight
- 2 AA Batteries (included)
