

The most versatile pro-grade flashlight in the world, with magnet clip.

The 3410M (magnet version) is the ultimate compact work light. Molded from “glow in the dark” photoluminescent material, this light is easy to find even when it’s off. The 3410M is equipped with both a spot and flood LED for close-up as well as distance, so you can have wide area light in the immediate work area and still penetrate darkness hundreds of yards away. It can be activated to run one or both LEDs with 3 levels of brightness. The articulating head and built-in clip allows the light to be directed wherever it is needed, while a heavy duty magnet allows the light to be snapped to steel surfaces.

The Pelican 3410M- a professional grade multi-task lighting tool that will help you get the job done- under any circumstances.
