

In a rare collaboration between public and private sectors, the City of Los Angeles Police Department (LAPD) has partnered with Pelican Products to develop the Pelican 7060 LED as the standard issue tactical/patrol flashlight for all its officers.

The Pelican 7060 LED light employs a revolutionary dual switch technology that allows the light to be activated by either a body-mounted patrol switch or a tail-mounted tactical switch. The dual switches, which include a momentary mode and high/strobe/medium/low beams, allows the user to grip the light in several positions and still control activation. In addition, the 7060 is self programmable. This allows the individual user to custom tailor the various modes to their liking. The light incorporates a rechargeable Lithium-Ion battery for maximum brightness and is also lightweight compared to standard batteries.

Battery, desk/dash charger, and multi-regional power supply included.

- Built Pelican tough
- Unconditional Lifetime Guarantee of Excellence
- **Where applicable by law
- Super bright LED beam
- USB Lithium Ion Rechargeable
- Lithium Ion Rechargeable Battery
- Peli's legendary lifetime guarantee**
